

## Get Radiant Running on your Windows Computer

Prerequisites - computer should have minimum 8 GB of RAM

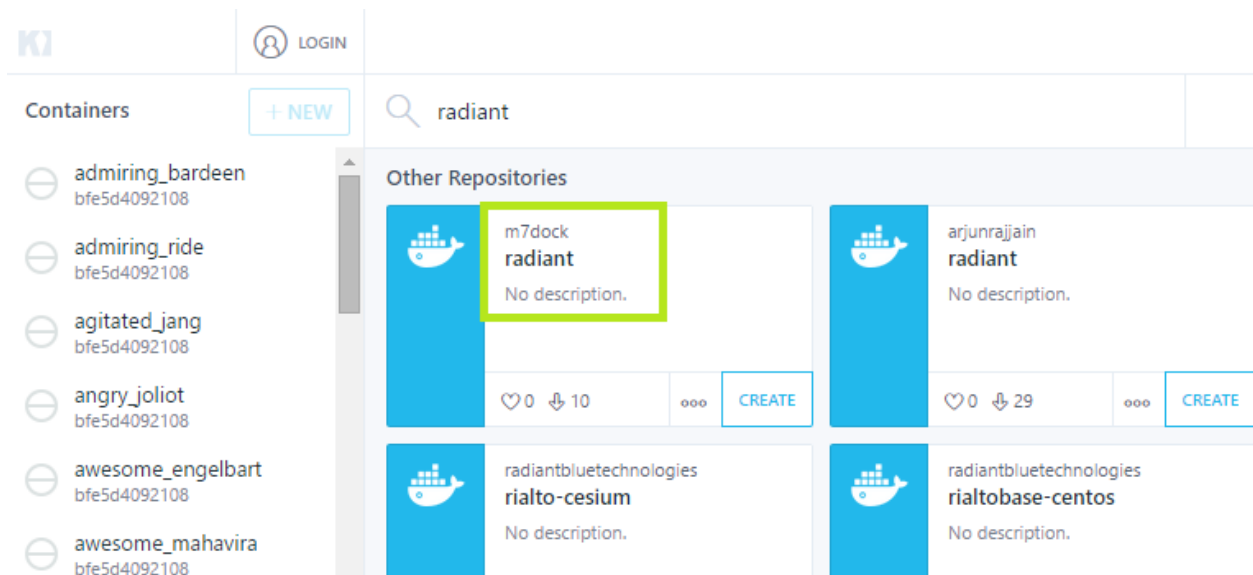

Step 1 - Install Docker

<https://docs.docker.com/engine/installation/windows/>

Step 2- Open Kinematic

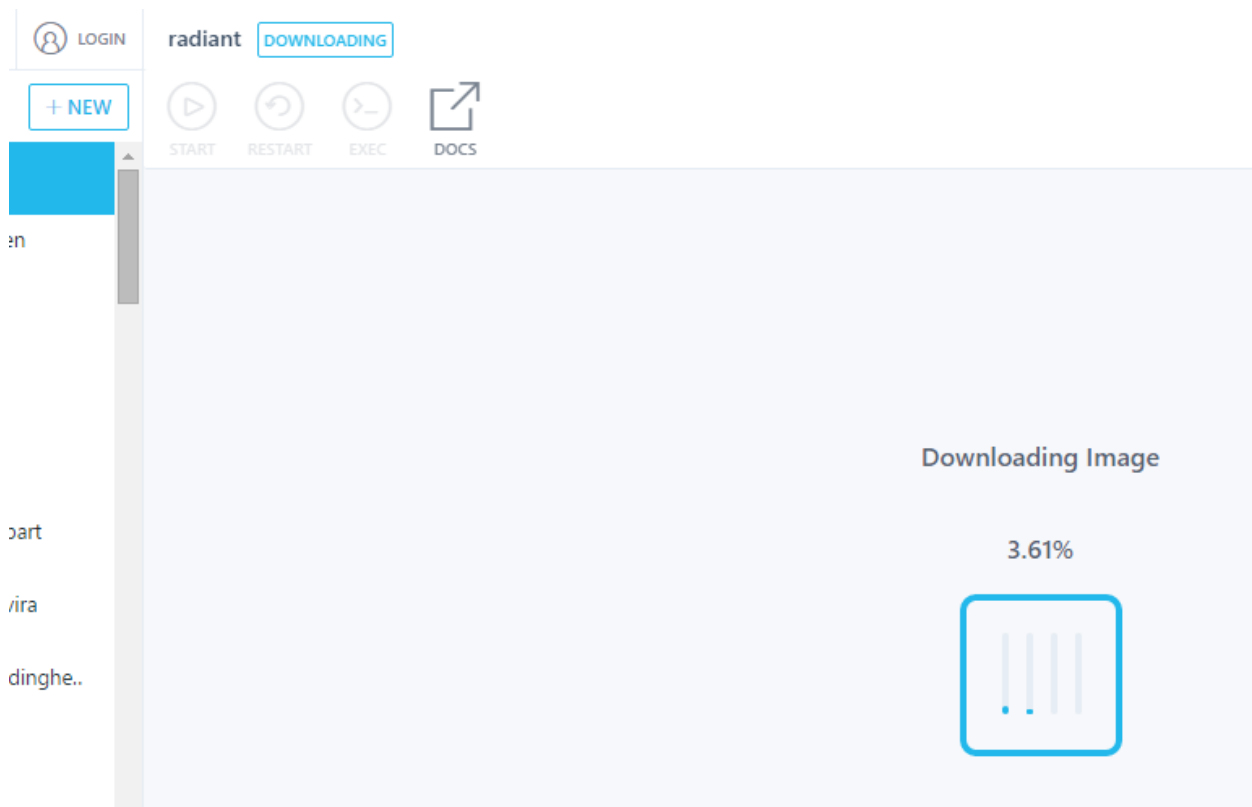

Search for radiant

Click Create button

Wait for Radiant to download and Run

After Radiant is up, Kitematic will show the IP:Port where Radiant can be accessed

Use the access URL to Formulate the Radiant access URL such as

Quant - <http://192.168.99.100:32768/radiant/inst/quant>

← → ↻ 192.168.99.100:32768/radiant/inst/quant/?SSUID=local-924da4

Apps Bookmarks Gmail Maps Hindi Movies Online. A one-time donation deviantART muro A Guide to Independence Bicycle
